

Nut Enuff

4 Shifts

1. Conveyor: Fill the conveyor belt. (6/6/6/7 per player, plus 1 facedown)
2. Collect:
 - a. All players start “in”.
 - b. Repeat until only one player is “in”:
 - i. “In” players secretly bid, bids are revealed. Low bid wins: winner collects that many cards from left of belt.
 - ii. Winning player may trade 1 newly collected card with any player who is “out”.
 - iii. Winning player adds collected cards to Desk: they are now “out”.
 - c. Final “in” player collects remaining cards, including the facedown one at the end. They may also trade 1 newly collected card.
3. Package: assemble cards on Desk into valid Packages, place in Packages area.
4. Cleanup: remove cards from Desk until there’s no more than 3. Removed cards go on the Floor.

Final Scoring

Players earn VP for Acorns on Desk and for Packages.

Players lose VP for cards on the floor as follows:

- First 3 cards on Floor: -1 VP each.
- Next 3 cards on Floor: -2 VP each.
- Any further cards on floor: -3 VP each.

E.g. Tim ends the game with 5 cards on the floor: he loses $1 + 1 + 1 + 2 + 2 = 7$ points.
