

Quick Reference

4 Shifts

1. Conveyor: Fill the conveyor belt.
2. Collect:
 - a. All players start “in”.
 - b. Repeat until only one player is “in”:
 - i. All players (“in” and “out”) secretly bid, bids are revealed.
 1. “In” players: low bid wins: winner collects that many cards from left of belt: collected cards go on Desk.
 2. “Out” players: match the winning bid to draw 2 keep up to 1. Off by one, draw 1 keep up to 1.
 - ii. Winning “in” player is now “out”.
 - c. Last “in” player collects remaining cards.
3. Package: assemble cards on Desk into valid Packages, place in Packages area.
4. Cleanup: remove cards from Desk until there’s no more than 3.
Removed cards go on the Floor.

Final Scoring

Players earn VP for Acorns on Desk and for Packages.

Players lose VP for cards on the floor as follows:

- First and second cards on floor: -1 VP each.
- Third and fourth cards on floor: -2 VP each.
- Any further cards on floor: -3 VP each.

E.g. Tim ends the game with 5 cards on the floor: he loses $1 + 1 + 2 + 2 + 3 = 9$ points.
